Airplanes

Wilbur and Orville Wright's first successful flight on the sands at Kitty Hawk, N.C. in December 1903 brought to reality man's eternal dream to conquer the air. Since that historic event right up to the present jet age, building scale replicas of famous airplanes has been a subject of interest to aviation enthusiasts of all ages. Originally built from scratch, airplane models were sometimes crude, sometimes highly detailed works of art. Today, through the miracle of plastics, model airplane kits offer a high degree of detail and realism. Monogram's line of model airplane kits ranges from historic biplanes of the '20s and '30s to the most modern supersonic jets of today and includes many classics from along the way. Each kit is developed through countless hours of background work and technical research and is an authentic reproduction of an actual aircraft.

AIR ACES

These kits are popular with model builders of all ages, many of whom will want to collect the entire series. Most are 1/72 scale, yet fantastically detailed. Molded in authentic colors.

Cars

Since the early days of motoring, thousands of cars of different makes have come and gone. A coveted few have attained the status of "classics" . . . museum pieces to be gazed upon by throngs of admirers. Many old time cars outside of the ranks of the classics are sought by collectors to be restored as "special interest" cars, to be customized as "show cars" or souped up as "mean street machines." In recent years, sports cars and recreation vehicles have become an important part of the motoring world.

Ships

For many centuries, the fascination of the sea has compelled men to build miniature replicas of sailing vessels. In days of old, it was common practice for sea captains to while away their spare hours whittling, carving and assembling exact models of the very ships on which they spent a good portion of their lives while at sea. Today's Navy ships are just as exciting and just as fascinating to modern day sea lovers. And building models of famous Navy ships is a hobby that is even more popular than in years gone by.

These Monogram kits are authentic reproductions of famous Navy vessels. Highly detailed, they have all the characteristic features of the full size originals. Decks, hulls and superstructures are intricately detailed. Kits are molded in color and include display stands and decals.

MONOGRAM®

Monogram takes pride in presenting these highly detailed kits that take the *wait* out of model-ship building. These "Tall Ship" kits eliminate the tedium and increase the enjoyment of ship-building by including mast and spar units that are one piece. The hull is also one piece to avoid problems of fitting two halves together. With this new method of construction, the ship model begins to take shape within the first few steps of assembly and the modeler has something to show for his effort long before the finishing touches are applied.

Over 16" long when assembled, Tall Ships are most impressive display pieces. They're molded in black and "natural-timber" beige. The sails are detailed, off-white and are "billowed". One-piece, detailed ratlines and thread are included for complete rigging. Kit includes flag sheet and display stand.

The Tall Ship series includes three of the most famous historic sea craft of all time . . .

3500 CUTTY SARK, famous clipper ship.

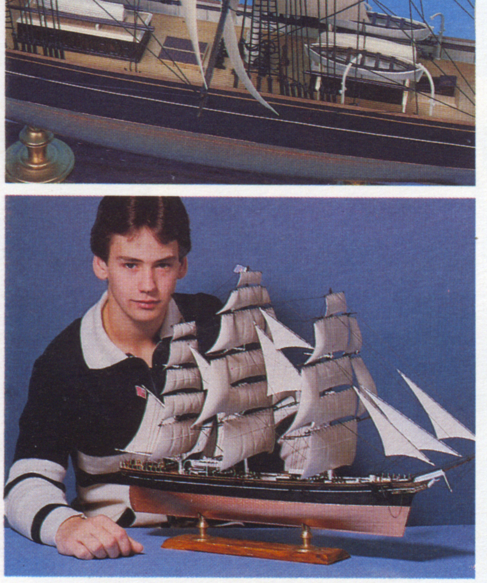
CLASSIC SAILING SHIPS

Three famous old sailing ships with dignified historical backgrounds have now joined the Monogram fleet in LARGE SCALE model kit form. Exquisitely detailed throughout, these are considered to be the finest sailing ship model kits in this size range. Hull, deck, deck structures, fittings, masts and rigging are all recreated with a realism that all model builders look for in a kit. Accurately dimensioned to produce a finished show-piece that can be displayed with pride, the kits are engineered with precisely fitting parts. Molded in color, the kits include pre-formed sails, rigging thread and elegant display stands.

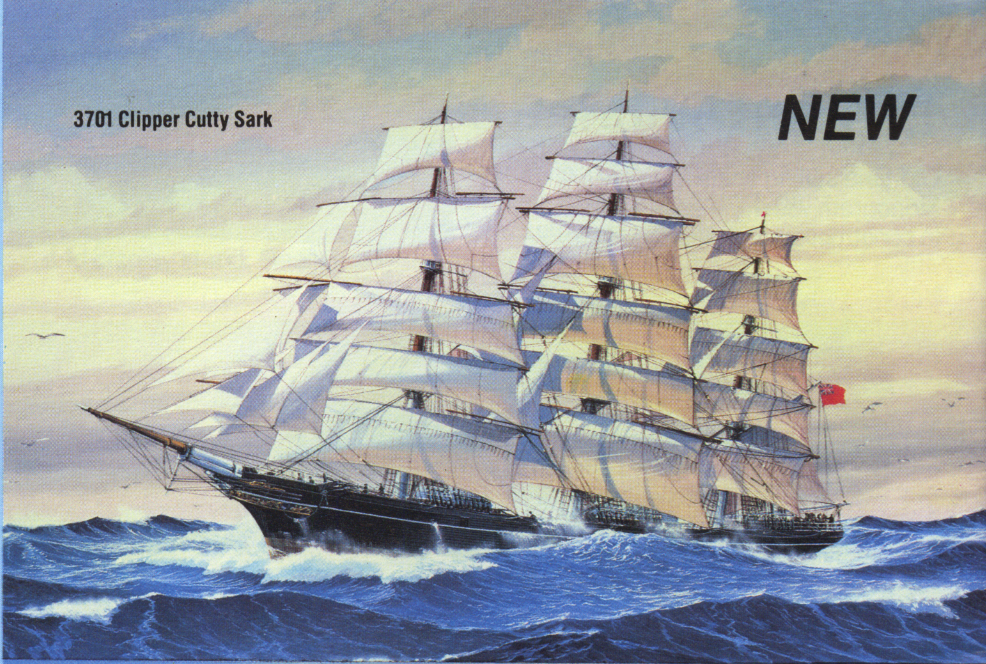
3701 Cutty Sark.
The fastest clipper ship of the great tea and wool trade of the late nineteenth century is reproduced in 1/120 scale. The finished model is 28½″ long and 18″ high.

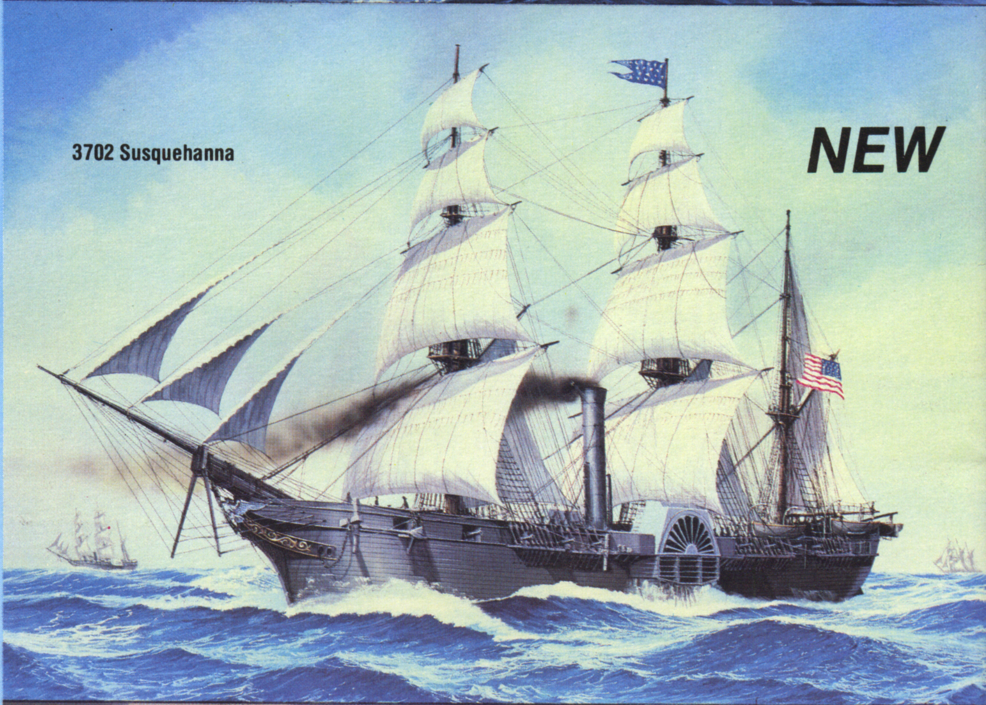
3702 Susquehanna.
In 1/150 scale, this model of a steam powered "side wheeler" U.S. warship of the 1800s is 28″ long and 17″ high.

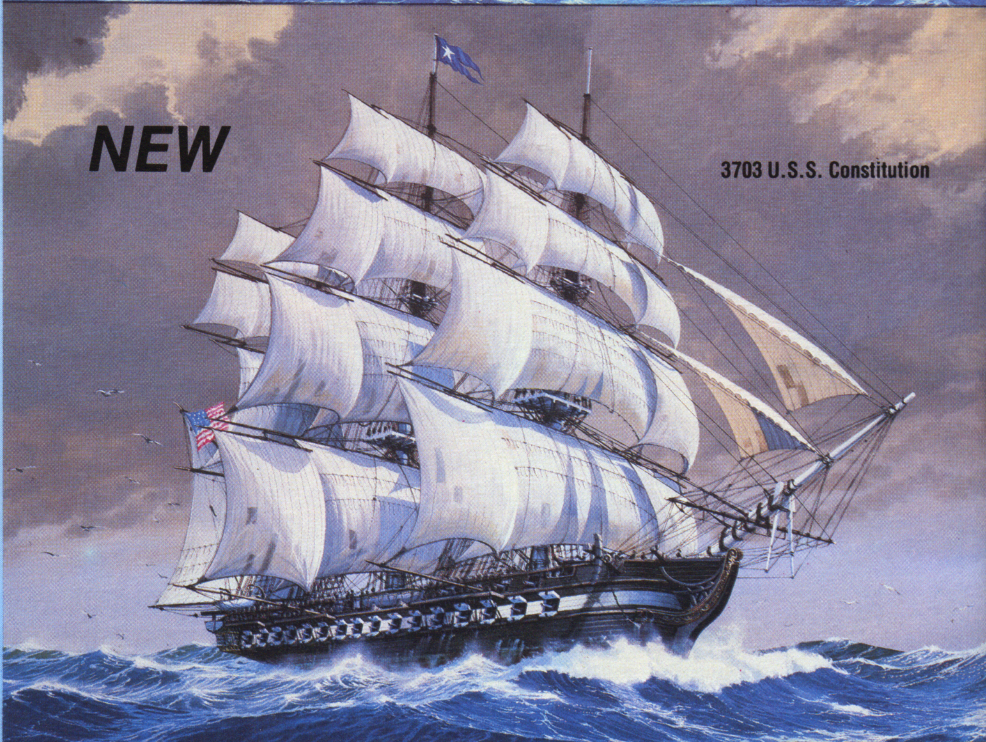
3703 U.S.S. Constitution.
Built in 1797 and heroic in the War of 1812, "Old Ironsides" sits today in the Boston Navy Yard, a floating historic shrine and still fully commissioned. The model is 1/120 scale and is 29″ long. 22″ high.



Available in U.S. only.







Armor

Building and painting scale models of historic armor weapons and vehicles is a unique hobby with many military enthusiasts. A skilled hobbyist can paint a 1/35 scale figure in lifelike realism including detailed facial features and uniform insignia. Tanks and other vehicles can be weathered and "battle-torn" to make them look authentic. Many military modelers will spend countless hours in research to get the proper historic background for the models they build, to be sure that all the details are accurate. Historic reference material also provides suggestions for building the assembled model into a diorama, which may often be a reproduction of an actual situation. Monogram kits are favorites of armor enthusiasts because of the highly realistic details in the models.

TANKS

Flexible crawler tracks, movable guns and figures of crewmen are features of these 1/32 scale kits. Molded in authentic color, Monogram Armor Kits are perfect for the current widespread interest in diorama building.

FLAP JACK®

This action-packed model is like nothing you've ever seen before. It'll amuse and amaze everyone who sees it in action. And the kit is easy to put together because there's no gluing. It's a Snap Tite® kit and it SNAPS together. No painting necessary, either.

7503 FLAP JACK®
It's a bird... it's a plane... it's the wackiest propeller driven jet plane you could ever imagine! You've got to see it to believe it. Flick the prop and it spins and spins, driven by the battery powered "Touch 'n Go" motor. Wings flap up and down... machine guns move back and forth. And with all this going on all at once, this unique, action-packed aircraft bobs and bounces all around on its springy wire support. An irresistible novelty for all who see it.

The magnificence of metal…in model kit form. The minute you feel the weight of a die cast model, you'll know that it's something special. You'll notice the look, the feel and the finish that only metal can give. Beautifully detailed throughout, these models, with their faithfully reproduced bodies, chassis, interiors and engines, are jewel-like miniatures of the actual full size cars.

All the body parts in these kits are die cast. They're clean and smoothly finished, making the kit a pleasure to assemble and assuring a perfect fit. The body can be painted, polished and waxed just like a full size car. The plastic parts are molded in color and there are many gleaming plated parts in the kits.

The finished display piece will impress anyone who sees it. The detail, realism and *feel* of the model will be especially appreciated when it is picked up to be closely studied. Four of the most popular sports cars and two classics are available in this 1/24 scale series. Many model car enthusiasts and collectors will want all six of these die cast metal kits.
